At a meeting of Democrats in Baltimore it was decided to celebrate the recent Democratic victory in the Monumental City on January 17, the date when Andrew Jackson was first nominated in that city as a Democratic candidate for President. There will be no booming of candidates and no resolutions will be adopted.

Arthur Miles, the slayer of Bessie Stith, in Louisville, last Spring, convicted and given a life term in the penitentiary, but later declared to be a lunatic and sent to the Hopkinsville asylum, last Wednesday, with the aid of another inmate, overpowered his guard and escaped. He had been examined a day or two before and the committee was ready to report that he was sane.

Johnson and McCreary seem to be in the lead for gubernatorial honors, though often in a convention the candidate who enters with the smallest number of votes comes out victorious. There is no lack of ability among the various candidates, and in our judgment ability and activity will have to combine, and we believe that the candidate who is the most active will win the nomination.

Twenty-five girls are dead, a half dozen are dying and twenty-three are in hospitals as the result of a fire which devastated a four-story factory at Orange and High streets, Newark, N. J. Many of the dead were killed by jumping from the windows and fire escapes and others perished in the flames, their bodies being buried in the ruins when the walls fell. Several firemen were injured in attempting to rescue the terror-stricken girls, and every hospital in Newark was filled with victims. The fire was caused by an explosion of gasoline.

Mr. D. W. McFarland sold the bacon and lard of four hogs he killed one year ago for \$157.65.

We see in the Roy correspondents last letter that he has been sick since the election and thought the trouble was in his Esopegus, but from the symptoms he gives it was in his stomach or probably below the diaphragm, and is known among medical men as spontaneous gass. It collects there from different causes. In his case we think his trouble was caused by voting under the Log Cabin. That is the only thing ever known to give a fellow the colic in the Esopegus where he thought the trouble was located. Now our advice to the Brother at Roy would be to take anemetic then he can emit. But we are fearful he will have derangement of stomach for some time yet.

To-day is Thanksgiving. Let us see what we have to be thankful for. First because we are alive and have reasonable health, because we are not narrow minded enough to think we are better than anybody else who tries to do right. We are thankful we do not adore vain clothes or have all on our back but our shoes. We are thankful we owe no one anything but good will and have plenty of that. Thankful we can lay down at night with a clean conscience and think as we please. More thankful that no one has a right to growl if we want to sit on the top rail of the fence and whistle until we can look a cold hard proposition square in the face and feel better and stronger afterwards.

Brook-haven, Miss.

Editor News:

As I have never seen a letter from the Sunny South in your paper thought I would write a letter about this country. This is a fine country, it is warm and pleasant down here.

We have had some frost, but has not killed the grass yet. There is plenty of grass for stock yet. People down here only feed their cattle three months in the year.

When I left my home in Kentucky some of the people said that this was an unhealthy climate, but that certainly is a mistake, for we have all had good health since we came here, and I have met several people from the North that have come down here for their health, and they say they have improved greatly since coming here.

I have sowed my oats and they are up. There is a large acreage of oats in this section.

I am in charge of my father-in-law's farm, J. A. Chapman. His farm is one mile from Brook-haven, lies on the Bogue Chitto River, and on the road from Brook-haven to New Orleans.

The main trunk line of the I. C. Rail Road runs on one side of the farm.

Brook-haven is a nice little city. Population is about twelve thousand, and has sixteen trains a day. I made a fine crop of corn. Have it all gathered. I made lots of hay. The cotton

crop was short in this section on account of the Boll weevil.

It will soon be Christmas and I would like to be with my old Kentucky friends during the holidays.

I will close for this time.

Respectfully,
F. A. Thomas.

Owensby.

Esto.

The health of this community is very good at present.

Corn gathering and bird hunting seems to be the general topic of the day here.

Mr. W. S. Coffey, who has been confined to his bed for some time, is slowly improving.

Eastham & Phelps are doing a good business with their corn mills.

The school at this place is progressing nicely under the management of Prof. J. Leslie Hale. He sure knows his work. The school gave a n entertainment last Friday night which was largely attended and all report a nice time.

Mr. Pascal Phelps is now a citizen of this place.

Everybody has certainly been engaged this fine weather, but I am afraid it's about over now.

Mr. B. A. Coffey is erecting a new house in our midst and we are glad to have him with us.

We are very sorry for those who had losses by fire in the last few week.

The school at this place will close in a few weeks and we are sure both pupils and parents of this district will regret to give up their teacher.

The recent rains were good on the wheat.
